

The diagram illustrates a multi-layered packaging structure for four different materials: CLAYSTONE, LIMESTONE, BASALT, and DOLOMITE. The structure is composed of several layers, each with a specific pattern or texture, and is labeled with numbers 10 through 17. The layers are arranged in a central vertical column, with additional layers branching off to the sides. The central column starts with a top layer (13) and a middle layer (11). Below these are layers 12, 15, and 16. The bottom of the central column is connected to a large, textured layer (17) which is further divided into two sections (15 and 17). The entire structure is supported by a base labeled 'Packaging & Distribution'.
